

PASGT DEMINING HELMET & VISOR

PASGT (US Personal Armour System Ground Troops protection services) uses our advanced plant and processing techniques to provide enhanced shell protection at a lower weight and improved comfort.

Ballistic Protection is offered against a variety of bullets to NIJ Standard 0106.01 and fragment simulated projectiles (FSP) to Nato STANAG 2920 and US MIL std 662F.

The PASGT uses a 5-point harness system instead of the 8-point in the standard US version giving improved comfort, balance and reduced fatigue. A 4- point harness system is also available.

Our harnesses use real leather for the brow band and head pads, high quality 100% cotton webbings for the chinstraps and polyester and nylon webbings for the headbands. Net-mesh crowns are optional on all harnesses.

The PASGT is also available as a bolt free helmet with a 7-pad suspension system that features no metal fittings.

Accessories

- Face Shields (Visors) to protect from Ballistic, Fragmentation and/or Riot threats
- Neck protection, NIJ Level II or NIJ Level IIIA
- Helmet bag, Visor covers and helmet covers
- Available colours: Black, Navy, Olive Drab, Desert Tan, UN Blue and white

Visor ballistic resistance

Visors	Mini Frag Velocity v50 (17 grain) m/s (ft/sec)	Bullet Resistance	Weight Grains	Max velocity m/sec (ft/sec)	Energy Joules
Riot	None	None			
Fragmentation	240 (800)	None			
fragmentation long	240 (800)	None			
Advanced fragmentation	500 (1640)	None			
Ballistic / Ballistic short	600 (2000)	9mm DM11A1B2 9mm FMJ Rem	123 124	420 (1345) 410 (1345)	670 675
Advanced Ballistic	790 (2590)	.44 Magnum SWC-GC	240	441 (1450)	1512

All Products are made with ISO9001:2015 QA Standards with Batch testing and Certification

Rezigt is the trusted brand of ballistic, blast and cut resistant materials. Please do ask if your specific enquiry is not easily answered.
